

# PARUL TATER

UX Designer | Design Engineer | Frontend Engineer  
(650) 200-6488 | [parulj12@gmail.com](mailto:parulj12@gmail.com) | [www.linkedin.com/in/parul-tater](https://www.linkedin.com/in/parul-tater)  
Portfolio: [parul.design](https://parul.design)

## SUMMARY

UX Designer and Frontend Engineer with 8 years of experience bridging design and development. I move fluidly between user research, prototyping, and production code — designing and building experiences end-to-end, across both digital products and human-centered events.

## SKILLS

- **UX & Design:** User Research (interviews, observation, synthesis) • Information Architecture & User Flows • Wireframing & Prototyping (Figma) • Usability Testing • Visual Design & UI Principles • AI-assisted ideation and rapid prototyping
- **Frontend & Technical:** JavaScript • TypeScript • HTML • CSS • React • Angular • Frontend Testing (Jest) • Design-to-Development Handoff

## EXPERIENCE

### Founder & Experience Designer | The Chaska Life

May 2024 - Present

*Independent experience design practice — running recurring community events end-to-end, from concept through delivery*

- Designed end-to-end experiential journeys for community-based events, focusing on user flow, pacing, and emotional engagement.
- Conducted qualitative research through observation and structured feedback collection; synthesized insights into improvements for wayfinding, accessibility, and engagement.
- Created experience systems — touchpoints, layouts, signage and content, visual standards — to deliver consistent, repeatable experiences across events.
- Iterated designs based on real-world behavior and post-event feedback, reducing friction during key moments: check-in, navigation, serving/queueing, and wrap-up

### UI/ UX Developer (Consulting) | Eating Analytics

Jun 2023 - Feb 2024

- Designed initial user flows and interaction patterns for a beta-stage health-tech product
- Prototyped core features in Figma for investor demos, directly influencing early product direction
- Collaborated with the founding team to iterate on UX based on beta user feedback

### Career Break - Extended Parental Leave

Aug 2021 - May 2023

### UI/ UX Developer | Aleccio

Aug 2020 - Jul 2021

*B2B open source platform to help ML experts build ML models using less data*

- Designed and developed a new onboarding workflow, increasing conversion and improving retention by 70%

- Redesigned the home experience to improve discoverability of public datasets and key actions
- Built core UI views, including a Project Workspace, using JavaScript, HTML, CSS, and Angular
- Partnered with product and customer-facing teams to incorporate feedback into iterative UI improvements
- Owned feature development end to end, from design discussions through implementation and validation

## **UI Engineer | Cloudera**

**Mar 2015 - Jul 2020**

*Hybrid data platform with secure data management and cloud-native data analytics*

- Designed and built internal tools for developer teams — translating complex workflow needs into usable dashboards for AWS cost visibility and CI/CD pipeline monitoring
- Improved usability of legacy enterprise applications through user-centered redesigns — adding progressive filtering, smarter sort defaults, and clearer information hierarchy based on team feedback
- Partnered with PMs, engineers, and stakeholders to bridge design intent and implementation — owning the design-to-development handoff for multiple product teams

## **Front End Developer | Data Marketing Inc.**

**Aug 2014 - Mar 2015**

- Developed internal data platforms and improved UX and visual design across company web properties

---

## **PROFESSIONAL DEVELOPMENT & EDUCATION**

**Master of Science, Software Engineering** | San Jose State University, San Jose, CA

**Bachelors in Computer Science & Engineering** | Mody Institute of Technology & Science, India

**Front-End Web Developer Nanodegree** | Udacity
